Dear Sir's,

Reg:- Supply of Machinery and Equipment for our 2500 T.C.D.
Sugar Plant as per Agreement Dated 12/08/1999 as well
as MOU Dated 24/08/2000.

We wish to put on records that the supply and erection of this plant was completed in record time of about 9 months. The boilers were commissioned on 2/10/2002 and after completing various trials the plant crushing was started on 2/12/2002, and commercial production of sugar started from 6/12/2002. Till date we are able to crush 189000 M.T. of cane and produce more than 213000 bags of sugar. The quality of sugar produced was tested in independent laboratories and results were quite satisfactory.

We sincerely appreciate the efforts put up by your team at site and head office at pune for completion of the project well within the scheduled time. The operational data of working of the plant for about 10 days between 05/01/2003 to 13/01/2003 was also judged at our end and we are satisfied with the over all working of the plant. Though we have crushed maximum 2825 T.C.D. on 12/01/2003, we could not achieve crushing more than 2500-2700 T.C.D. on regular basis due to paucity of cane. We may have to close the operation for this 2002-2003 trial cum first season within 1 or 2 days due to short supply of cane.

We are quite confident that we shall be able to achieve better results and higher crushing rates during next season when we expect that cane supply will improve.

We seek your co - operation and guidance in future too.

Thanking you.

Yours' s Faithfully,

Vishwanth Shinde
